

# Data Sharing Statement

Shah. Sex Differences in Long COVID. *JAMA Netw Open*. Published January 22, 2025.  
doi:10.1001/jamanetworkopen.2024.55430

## Data

**Data available:** Yes

**Data types:** Deidentified participant data, Data dictionary

**How to access data:** Because the RECOVER Adult Cohort Observational Study is in progress and the datasets are updated dynamically, individual patient/participant data will not be provided at the time of publication. However, the data dictionary is published on the RECOVER website and a link will be made available. Furthermore, NHLBI has undertaken a significant effort to release harmonized data from all RECOVER observational cohort studies to the public via their BioData Catalyst platform within the next six months. When these data are released, the datasets will include participant-level data collected for the present study, as well as the technical infrastructure and analytic tools to evaluate the results and conclusions from this study. <https://recovercovid.org/> <https://biodatacatalyst.nhlbi.nih.gov/>

**When available:** beginning date: 04-25-2024

## Supporting Documents

**Document types:** None

## Additional Information

**Who can access the data:** Researchers whose proposed use of the data has been approved

**Types of analyses:** For a specified scientific purpose

**Mechanisms of data availability:** After approval of a proposal and with a signed data access agreement
