

FIGURE S1 The relative abundance of bacterial and archaeal phyla in Amazon rainforest (Forest) and adjacent cattle pasture (Pasture) soil. The numbers after “A” in the sample names indicate the distance to the start location on a 100 m transect. The asterisks next to phyla names indicate the significance ($p < 0.05$) determined by DESeq2 ($p < 0.05^*$, $p < 0.01^{**}$, $p < 0.001^{***}$).
